

Nursery PRO

FEED FOR SHRIMP

Nursery PRO is a top quality nursery and raceway feed for shrimp. It provides a soft transition from hatchery to grow-out, ensuring optimal continued growth and a very high survival rate.

Nursery PRO has been produced by an adapted micro-extrusion process followed by marumerisation. This innovative technology provides full water stability of soluble and insoluble nutrients in the feed while avoiding the use of chemical binders. Nursery PRO does not pollute the water and it retains palatability and nutritional quality in water for more than 12 hours. Nursery PRO is nutritionally complete for super intensive culture conditions.
