

Amino PRO

SUSTAINABLE PROTEINS

Liqui PRO combines a customised blend of hydrolysates, suger and acids to improve the absorption of key amino acids and to create enhanced growth.

The use of Liqui PRO allows for a reduction in the crude protein levels and it also reduces the need for non-sustainable plant and animal proteins in the final feed. Liqui PRO is formulated to your own specific requirements, providing a tailor made product.

Analysis

NUTRIENT	VALUE	NUTRIENT	VALUE
Protein (%)	45.2	Lysine (%)	22.75
Dry matter (%)	47.0	Methionine (%)	11.65
Digestible Energy (%)	9.3	Methionine+ cysteine (%)	11.75
Ash (%)	4.0	Arginine (%)	0.55
Digestible Protein (%)	46.5	Threonine (%)	0.40
PUFA (%)	5.67	Histidine (%)	0.10
N6 (%)	2.14		
N3 (%)	3.40		

Ingredients

Mixture of essential amino acids and sugars in liquid form.
Brown liquid. Variation in color is possible but does not affect the performance.

Storage condition

Store in ambient, dry conditions.
20°C maximum storage temperature for recommended shelf life.

Instruction for use

Liqui PRO should be added in as a feed ingredient for *Penaeus monodon* and *Litopenaeus vannamei*.
This product could be used throughout the life-cycle of animal in the grow-out pond.

Packaging

1,000 kg IBCs

Shelf-life

6 months after opening and by expire date.
